 Website (http://nowell.strite.org)

Key Qualifications

- 15 years building Web applications
- Proven developer with extensive "managing developer" experience leading the architecture and development of core products
- Embrace open source technology and the collaborative and iterative development approach that it inspires
- Employ an Agile based software development approach with a healthy recognition that interpretation is always necessary to craft a methodology that fits an organization's culture
- Proven ability to lead conversations with internal and external clients to extract business requirements and translate/distill stories into elegant and robust technical solutions
- Strong application architect and developer, leveraging rapid prototyping and iterative development
- Integrate solid communication skills and creative problem solving into every stage of development
- Commitment to a hiring and collaborative philosophy which creates a cohesive, dynamic and passionate development culture

Education

Bachelor of Science, University of Illinois at Urbana-Champaign — 2004
Computer Science, College of Engineering

Skillset

⚙ Server-side

| Python | Django | Ruby | Ruby on Rails | Clojure | RESTful Webservices | SOAP & XML-RPC | NodeJS | Java | PHP | ColdFusion |

</> Client-side

| Javascript | Backbone.js | Require.js | D3.js | Handlebars.js | Mocha.js | Chai.js | LESS | SCSS | CSS | HTML |

✏ DevOps

| Chef | MySQL | PostgreSQL | SOLR | Cassandra | Nginx | Apache | Vagrant | Amazon EC2 | Rightscale | EngineYard |

👍 Other

Experience

WiserTogether, Inc.

Principal Engineer

2013 - Present   Python   Django   Javascript   D3.js   Require.js   Backbone.js   Mocha.js   Chai.js   PostgreSQL   Puppet   GIT

- Led the development of an interactive D3.js powered visualization tool that powered our healthcare decision tool (http://nowells.github.io/resume/img/bullseye.gif)
- Developed a foundational Javascript framework for external contractors (built on on-top of Backbone.js) to ensure consistent approach to frontend javascript applications
- Established out automated frontend testing suite for our growing single page applications using Mocha/Chai/Karma.
- Spearheaded the development and Open Sourcing of several libraries used to grow our Backbone.js testing capabilities

Draker Laboratories

Director of Software Engineering

20011 - 2013   Ruby   Ruby on Rails   Clojure   Javascript   Backbone.js   MySQL   Cassandra   Chef   GIT   i18n

- Architected the core time-series data system to replace an aging MySQL solution with a highly scalable service backed by Clojure, Cassandra and RabbitMQ
- Established an Agile process to facilitate a rapid development and release cycle that significantly increased customer and company responsiveness and transition us from a release every few months, to multiple releases a week
- Successfully designed, developed, and led the technical merger of our product with our acquired company over the course of two months in order to differentiate us at our largest industry trade show in an increasingly dense competitive landscape
- Oversaw and negotiated a software staff increase as well as a company merger from five software developers to a fifteen member software development team consisting of QA, Design, DevOps, and Developers
- Automated the internationalization (i18n) of the web application into Japanese, allowing for seamless extension to alternate languages

Public Broadcasting Service

Senior Manager of Technology Solutions

2007 - 2011   Python   Django   Javascript   Backbone.js   MySQL   SOLR   RabbitMQ   Amazon EC2   Paypal Payflow Pro   GIT

- Successfully launched the nationally recognized PBS LearningMedia service that powers 40+ PBS/partner educational sites
- Architected and developed the RESTful API service for the educational content service that runs PBS LearningMedia
- Designed automated deployment and scaling infrastructure to meet the growing demand of the APIs to PBS stations
- Manage and inspire a team of 6 passionate, creative and diverse in-house developers along with multiple off site contractors
- Coordinate all product releases and development as lead architect and developer
- Direct projects through all phases of development (scope, requirements, use cases, design, prototyping, development and launch)

- Originate budgeting, project scheduling and application & server architecture
- Provide coordination with product management, program management, operations, IT and marketing/sales
- Crafted a software development life-cycle that fit the culture of PBS and implemented it into project intake and development processes

Manager of Digital Development

2007   Python   Django   Javascript   Backbone.js   MySQL   Xapian   Amazon EC2   Paypal Payflow Pro   GIT   SVN

- Demonstrated leadership as technical lead; managing multiple project timelines and deliverables; working with colleagues to identify and develop solutions to operational requirements and shortcomings
- Negotiated with multiple companies to donate products and services to PBS resulting in recurring savings of over $40,000 (Atlassian, ExtJS, Github, etc.)

Senior Web Technologist

2005 - 2007   ColdFusion   Java   Javascript   Microsoft SQL Server   Microsoft IIS   Visual Source Safe

- Developed and maintained existing e-commerce portal and learning management system
- Initiated transition to open source platform
- Spearheaded introduction of version control and deployment processes into the product development cycle

Freelance

Technical Consultant

2009 - Present   Python   Javascript   GIT

- Led the training, tailoring, and implementation of the Agile process into existing teams
- Implemented Version Control workflows from CVS/SVN/Rsync based systems to a GIT based system with a branching model that allowed for better feature isolation, bugfixing and deployment planning

BearingPoint

Systems Analyst

2004 - 2005   PL/SQL   PHP   Oracle 9iAS   HTML   CSS   Javascript

- Built a suite of enterprise web applications using PL/SQL (Oracle 9iAS)
- Assisted client program managers in tracking and running metrics on their planned acquisitions and existing contracts

Textron Lycoming

Freelance Web Development Consultant

1998 - 2004   Java   JSP   PHP   ASP   Visual Basic   DB2   Oracle   Microsoft IIS   HTML   CSS   Javascript

- Designed and provided ongoing development and maintenance of national award-winning dynamic Internet site to allow customers to access company resources (JSP with DB2 backend)
- Created and introduced, with continuing development and maintenance, a unique Intranet site providing executives and employees access to critical business and process information. (ASP with Oracle backend)
- Developed numerous custom applications and tools to solve unique client problems involving the conversion, automation, and filtering of business data (Visual Basic, PHP, ASP, Excel, Access)
- Created external marketing site, parts database
